SocialRx

Maximise the performance of your social prescribing programme

Social Rx is a complete **digital management system for social prescribing**. Using Social Rx, teams can keep track of service users, refer people to appropriate groups and services and gain useful insights via population-level data, such as patient outcome and wellbeing improvements and referral activity.

Key Features

Caseload Management – link workers can manage cases in Social Rx, scheduling appointments, recording assessments, actions plan & case notes as well as booking community referrals.
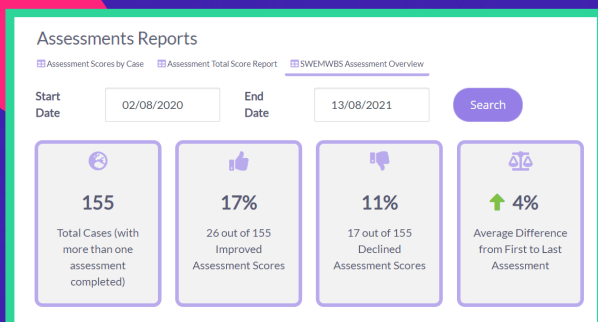

Community referrals & local Directory of Services – our system includes an easy-to-use directory of services, enabling link worker teams to build a database of community services they can refer into.

Interoperability with primary care systems – two-way interoperability with EMIS Web and SystmOne to enable GP's to easily refer patients into the social prescribing service. Data recorded can be filed back into the GP patient record.

Dashboards & Reports – our software includes a range of relevant dashboards and reports enabling link workers and teams to review data at an individual and population level.

Assessments Reports

Assessment Scores by Case | Assessment Total Score Report | SWEMWBS Assessment Overview

| Start Date | 02/08/2020 | End Date | 13/08/2021 | Search |

| 155 | 17% | 11% | ↑ 4% |
| Total Cases (with more than one assessment completed) | 26 out of 155 Improved Assessment Scores | 17 out of 155 Declined Assessment Scores | Average Difference from First to Last Assessment |

Our range of **reports** contain easily exportable, tabular data allowing for key KPI analysis in a numerical format. Here, our assessments report shows the overall performance of the social prescribing programme at improving wellbeing.

Key Benefits

Link Worker teams:

Better manage and organise your workload. With Social Rx, you can manage and record caseload activity; record action plans, assessments, case notes and book patients into services.

GPs & Commissioners:

Ensure achievement against social prescribing DES target – PCNs are eligible for **£4,000 per year**.

Maximise the performance of your social prescribing programme with population-level insights and analysis.

Our range of **dashboards** enable real-time view of key population level data metrics in a visual format. Here, our referrals by GP practice dashboard enables a breakdown of GP practice and PCN-level performance against the social prescribing DES target.

Functionality Overview

	PCN Edition	CCG/Borough Edition
