

ADJUTANT

AUTOMATE, RESPOND, INTERACT

During a major incident, fast, relevant information can save lives.

Adjutant was created after responding to a major terrorist attack in London and subsequently working in emergency planning. Having experience in responding to fast moving, dynamic events and looking at planning systems within large organisations and realising that this process could be made faster and more efficient by using modern technology and utilising the cloud.

Adjutant will allow you to:

- Utilise iOS and Android systems to communicate at the heart of an incident.
- Allow you to look at your plans in a more strategic way
- Identify tactics more quickly.
- Have a complete co-ordinated response.
- Reduce response times.
- Real-time feedback from ground level up on completion of action cards & availability

Automate Plans

Easy to set up, use and keep up-to-date

Interactive and relevant action cards

Provides training and audit trail facility

Adjutant Software is not based on templates. Everything is customised to the way your business operates. Adjutant is bespoke, flexible and adaptable. It can potentially speak to your existing systems so all information needed during an incident is available on one app saving time and potentially lives.
