Count & Control People Flow

Site Occupancy Management

Easily and affordably manage your business occupancy levels in real-time

As businesses adapt to the new normal, STANLEY Security's Site Occupancy Management allows you to control the number of people allowed in your business at a time to follow new guidelines set by goverments.

Gain peace-of-mind as you start to operate again whilst maintaining safety of the people within your organisation, visitors and customers.

Key Solution Benefits

- Collect real-time occupancy information from your business premises
- Accurate, automated and affordable to comply with government requirements
- Fast & easy installation by our technicians
- Scalable solution for multiple and seperate access and exit points
- Enables social distancing
- Perfect for lobbies, doorways and other key access points
- Includes complete solution: Time of Flight camera, hardware, software and displays
- Easily set a customizable count and adjust as needed

Site Occupancy Management is a great addition to your existing comprehensive security system.

We're Here to Help Your Business Adapt

Designed to analyze people count & flow
Site Occupancy Management software was developed to allow businesses to enforce local regulations on maximum occupancy

Enables social distancing
Non-contact counting eliminates contact between personnel and customers on-site

Affordable
Priced significantly lower than other occupancy management solutions
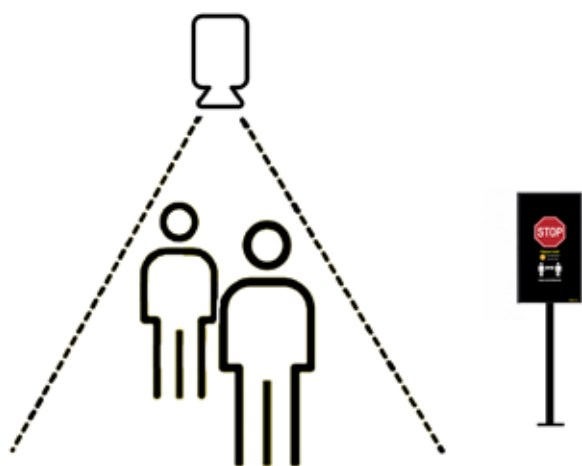

Fast, automated screening
In seconds, the system automatically detects a person to measure body count at that given location so you can manage how many people can be in an area

Proven, accurate technology
95% detection accuracy which is higher than using traditional video cameras

Easy to install and easy to use
Start counting and managing access to persons once set up by our technicians

Site Occupancy Management: How does it work?

- Person walks under 3D sensor
- 3D sensor detects person entering or exiting
- Software in analytics computer adjusts count
- Updates display to manage flow
- See live count and make changes on mobile app (if applicable)
